

Errata to
Fundamentals of Air System Design Self-Directed Learning Course, I-P Edition (2008)
December 8, 2010

Page 7-29: In number 3, section c, the equation currently reads $0.359 \text{ in. wg} \times 2 = 0.072 \text{ in. wg}$ but should read $0.359 \text{ in. wg} \times \mathbf{0.2} = 0.072 \text{ in. wg}$.

Page 9-3: The last sentence of the last paragraph currently reads “The parameter a in both figures is the ratio of the system pressure drop to the drop across the damper at maximum (fully open) flow” but should read “The parameter a in both figures is the ratio of **the pressure drop across the fully open damper at design flow to the total subsystem pressure drop, including fully open control damper pressure drop.**”
