

You Could Save The World

...by designing a building system that uses less energy!

...by designing a system that allows people to breathe cleaner air!

...by designing surgical equipment to treat certain types of cancer!

...by designing a cooling system that preserves medicines and live organs for use!

These are just some examples of how you could save the world through a career in the exciting and ever-changing heating, ventilating, air conditioning and refrigerating (HVAC&R) engineering industry!

For more information about careers in HVAC&R engineering, contact ASHRAE at:

ASHRAE • Assistant Manager of Student Activities • 1791 Tullie Circle NE • Atlanta, GA 30329
