User Tip #6: Building EQ System Outputs

August 2019

The Building EQ Portal has a number of system outputs available to assist building owners, assessors, and energy consulting firms in presenting information from the assessments in order to improve a building's energy performance. The available system outputs include:

User Input Report

- Recap of all data entered into the Portal
- Blank report available for use of data collection offline
- **FREE** to all users

Calculated Building EQ Performance Score

- Visible at top of online Portal page after input of minimum required data
- Indicates your building's energy performance as compared to similar buildings
- **FREE** to all users

Building EQ Label Report

- Graphic representation of Building EQ score on a barometer scale
- PDF file can be used to create a building plaque for display
- **FREE** to credentialed users for approved submissions

Building EQ Narrative Audit Report

- Customizable MS Word Level 1 Energy Audit report template
- Meets ASHRAE Standard 211 reporting requirements
- Auto populates In Operation assessment data from Portal into report
- Can be edited and tailored to distinguish/brand an Assessor or their firm
- Saves report preparation time for Assessor and provides a consistent format for assessment and audit information
- **\$200** to credentialed users for each approved submission

Building EQ Spreadsheets Audit Report

- ASHRAE Standard 211 Level 1 Energy Audit worksheets in MS Excel format
- Auto populates In Operation assessment data from Portal into report
- Additional information entered by user
- Can be used as an attachment to a narrative audit report
- **\$50** to credentialed users for each approved submission

Building EQ Disclosure Report

- Presents key energy information and Building EQ Performance Score
- Provides documentation for disclosure ordinances
- Suitable for real estate transaction energy disclosure
- **\$50** to credentialed users for each approved submission
