

What can ASHRAE do for you?

ASHRAE is a technical society with members in over 130 countries around the world. Members include engineers, architects, educators, and other industry professionals, passionate about the built environment. The Society and its members serve as a leading source of expertise for policy makers in the development of legislation affecting the public, and the profession.

Advise and Assist

ASHRAE engineers have the expertise to advise on a variety of topics including building systems, energy efficiency, indoor air quality, refrigeration and sustainability.

Support Research

ASHRAE's research program currently supports more than 70 active research projects.

Educate and Workforce Training

With publications, courses (including eLearning), and professional certification programs, ASHRAE provides value to thousands of built-environment professionals, employers, and building owners.

ASHRAE has more than 200 standards and guidelines that establish recommended design and operation practices. Some of our ANSI-accredited standards include:

ANSI/ASHRAE Standard 55-2013

Thermal Environmental Conditions for Human Occupancy

ANSI/ASHRAE Standard 62.1-2016

Ventilation for Acceptable Indoor Air Quality

ANSI/ASHRAE Standard 90.1-2016

Energy Standard for Buildings Except Low-Rise Residential Buildings

ANSI/ASHRAE/IES Standard 100-2015

Energy Efficiency in Existing Buildings

ANSI/ASHRAE Standard 105-2014

Standard Methods of Determining, Expressing, and Comparing Building Energy Performance and Greenhouse Gas Emissions

ANSI/ASHRAE Standard 188-2015

Legionellosis: Risk Management for Building Water Systems

ANSI/ASHRAE/USGBC/IES Standard 189.1-2014

Standard for the Design of High-Performance Green Buildings Except Low-Rise Residential Buildings

Alternate compliance path to 2015 International Green Construction Code (IgCC)
