Ex Historical Committee member and chair Paul Yunnie forwarded an excerpt from the April 2019 issue of HVAC&R Nation published by AIRAH.

It has a short news item on page 8 that the new Museum of Bavarian History in Regensburg Germany will have an exhibit on Carl Linde featuring his first refrigeration system he developed in 1876.

The museum website is https://tourismus.regensburg.de/en/about-regensburg/attractions/more-sights-to-explore/museums-galleries/the-museum-of-bavarian-history.html but the current webpage does not mention the Linde exhibit.

Here is an image of the news item in HVAC&R Nation provided by Paul. To see the original go to the magazine’s website
