ASHRAE’s Investors: Making a Difference

2017–18
HONOR ROLL
Thank you!
Dear Members and Friends,

Society Year 2017-18 was an active year for ASHRAE! We’ve continued to provide best-in-class research, publications, continuing education, and standards for our members and partners in the HVAC&R industry. Our work makes it possible for ASHRAE to solve some of the world’s greatest problems.

As chairs of the Development Committee and the Foundation Board of Trustees, our charge was to share the importance of supporting ASHRAE’s mission by contributing time, talent AND treasure. We are proud to announce that because of you—our leadership, chapters, industry partners and members across the globe—we’ve had an exceptional year of giving, having raised over $3M in support of ASHRAE’s mission. The RP Campaign has experienced another new high of giving and the Foundation’s scholarship endowments have grown in number and have enjoyed healthy earnings. Also, every member of the Board of Directors showed their commitment to supporting ASHRAE’s programs and priorities by making a financial contribution.

Thank you for everything you have done in support of ASHRAE to make this a successful year! Our collective efforts have enabled our success. We will continue to embody a passion for innovation and distinction, as we have done for the last 124 years. Congratulations again for a great year of giving!

With sincere thanks,

Chuck Gulledge
Development Committee, Chair

Bill Harrison
ASHRAE Foundation Board of Trustees, Chair

We have it in our power to change the world over.
—Thomas Paine

October 2018
61% of Chapters achieved RP Full Circle

WHAT IS FULL CIRCLE?

Chapters and Regions are recognized as achieving “Full Circle” each year when all officers make Honor Roll level gifts in support of the RP Campaign.
Q&A with ASHRAE Scholarship Donor Gordon V. R. Holness, PE, and Scholarship Recipient Trevyn Sell

Gordon V. R. Holness has been a member of ASHRAE since emigrating from the UK to Toronto in 1964, when he was introduced to the Society by his mentor Robert Tamblyn (ASHRAE Fellow and Hall of Fame member). Bob emphasized the member benefits of ASHRAE to Gordon, specifically the handbooks and involvement in Technical Committees TC 6.9 and TC 5.8. Gordon’s involvement in ASHRAE proved to be invaluable, providing him with technical knowledge and leadership skills that changed his life.

In recognition of all that ASHRAE has done for him, Gordon established the Gordon V. R. Holness Undergraduate Engineering Scholarship in 2015 and the Gordon VR Holness Engineering Technology Scholarship in 2018. His generous gifts have allowed three deserving students to get assistance with their engineering educations so far.

“I owe much of my success to peer-to-peer relationships from involvement with ASHRAE over the past 50 years. The scholarships are just one of the ways I want to express my appreciation and give back to the Society.”

Please enjoy the interview below from Gordon and this year’s Undergraduate Engineering Scholarship recipient Trevyn Sell, who shares his educational goals, his interest in the HVAC&R industry, what ASHRAE means to him and more!

**Gordon:** How did you become involved with ASHRAE?

**Trevyn:** My University (Kansas State University) has a student branch of ASHRAE. I have been a member for three years, and I have served as the Thermal Systems Representative and the Trip Planner.

**Gordon:** How has ASHRAE assisted you in your life journey?

**Trevyn:** It has opened many doors for me personally and professionally. Not only do I get technical knowledge from this organization, but I gain contacts from all different corners of the industry to gain a broader understanding and a terrific personal and professional support system.

**Gordon:** What advice would you give to engineering students interested in a career HVAC&R?

**Trevyn:** Get involved with ASHRAE and try to take all the relevant classes you can. The classes will give you a great base of knowledge, but ASHRAE can give you personal connections, hands-on experience, and a deeper understanding through people involved in all parts of the industry.

**Gordon:** What or who encouraged you to apply for this scholarship?

**Trevyn:** Our student chapter advisors, Julia Keen and Fred Hasler. [Editor’s note: Julia Keen is a current Society Vice President.] 

**Gordon:** How has receiving an ASHRAE scholarship assisted in your education?

**Trevyn:** I specifically attended Kansas State University for its Architectural Engineering program, and as an out of state student that made everything more expensive. This scholarship allows me to focus more on learning and performing well in school rather than trying to scrape by working multiple jobs. Being an ASHRAE scholarship recipient is something that will help me achieve all my goals. Not only did I learn a lot to get here in the first place, but now I have financial help to keep me on my journey.

**Gordon:** What would you say to those who are considering establishing a scholarship to support those pursuing a career in HVAC&R?

**Trevyn:** Students are so grateful and appreciative of this help. If you are able to assist students working towards graduating and entering this profession, the support can help everyone for a multitude of reasons and may just be a deciding factor for if and where they can finish their degree.
Gordon: What are your priorities this academic year?

Trevyn: I will be finishing up my degree and taking my final Senior Project class, which brings the knowledge of all MEP (mechanical, electrical and plumbing) systems together. I want to soak in as much as I can so I can aid the industry as much as possible once I enter it full time in just a few months.

Gordon: How does your University benefit from having an ASHRAE scholarship recipient?

Trevyn: It helps retain students, and it also shows that our ASHRAE-connected faculty is doing a great job providing us with knowledge, resources, and opportunities to develop our skill set to the highest level on a national stage.

Gordon: Who should give so that future scholarships are available for other students?

Trevyn: Anyone who wants to give should give, if they are able. Anyone who has received a scholarship should give back once they become financially stable. I will definitely be returning the favor one day!

Gordon: What does it mean to be a leader?

Trevyn: A leader is someone who paves the way for others. They teach others about themselves and prove to them that they are so much smarter, stronger, and powerful than they even knew. A leader will sacrifice so others around can rise, and the end goal of a leader is for all the people who were once following to become leaders themselves.

Gordon: What are some of your aspirations in life?

Trevyn: I want to rise to a prominent leadership position in a company where I can mentor younger engineers. I also would enjoy possibly teaching at the collegiate level one day. I have a passion for music and the marching arts, and working part-time with high schools and Drum Corps International groups would also be something I would strive to incorporate. On a more fun note, I want to travel as much as I can to as many places as I can.

Closure Remarks

Trevyn: Thank you so much, Mr. Holness, for the gift of this scholarship. I am beyond grateful for it and thankful that you set it up in the first place. Your gift will allow me to focus on my studies and better prepare myself to step out into industry. Your generosity has made my life a little more flexible so I can focus on learning instead of stressing out about where my tuition, food, and rent money are coming from. From the bottom of my heart, thank you!

Gordon: I wish you every success as you complete your engineering studies. You are about to embark on an exciting career in the HVAC&R industry. Take advantage of all the resources that ASHRAE has to offer – they will provide you the knowledge, training, and leadership skills necessary and will help to build your self-confidence for success. You have the opportunity to make a real difference and leave your own legacy!

The advice I would give to any engineering student interested in a career in HVAC&R would be to decide early on what aspect of the industry you want to be involved in (research, engineering, consulting, design, contracting, manufacturing, sales/marketing) and to select your employment accordingly. To fully achieve success, you must love the work you do. Try to get into an internship program while you complete your education—it will make you a more credible and valuable job candidate. Get your professional registration as soon as you are eligible. Don't be afraid to look around when you get into your career and seek out the best opportunities to meet your goals. I moved from the U.K. to Canada and then to the USA, building up my resume, and that led me to the company where I spent the last 32 years of my 50-year career.
When I was asked to come out of RP Retirement for my second stint as Chair of the RP Committee after an unexpected vacancy, I didn’t hesitate to say yes. I always tell people that once you’re an RP person, you’re always an RP person – and I was glad to be able to put my knowledge of RP fundraising and my love for ASHRAE to work in this valuable campaign once again.

RP is a grassroots committee; we depend on members to accomplish our goal of funding ASHRAE Research and other valuable programs. We rely on over 200 volunteers at the Chapter, Regional, and Society level, and I was fortunate to be able to attend several RP Centralized Training Sessions – in the U.S. and at the Region XIII CRC in Singapore – to meet these volunteers and share what I’ve learned about conducting successful RP campaigns. I also had the pleasure of attending RP fundraising events at the Jacksonville Chapter and the Hong Kong Chapter and saw the ways ASHRAE members embrace the cause of advancing ASHRAE. The passion our volunteers have for ASHRAE is amazing. The committee is grateful for the countless hours our volunteers spend running their campaigns and raising funds for the important work ASHRAE does for members, the industry, and the world.

This year, donors to ASHRAE RP supported our unique technical research program with gifts to help ensure that our 100-year old legacy of cutting edge research into the HVAC&R industry will continue for another year. Donors also supported ASHRAE’s educational programs and activities, Scholarships, and YEA - Young Engineers in ASHRAE, at a record high total.

Because of you and your generous support, the RP Annual Campaign reached several milestones, such as:

• Raised an amazing $2,708,279; a new high total for the ninth year running!
• This includes $238,269 raised for ASHRAE Scholarships through the RP Campaign
• More than 7,000 contributions from Members, Organizations, and other Associations, many contributing multiple times
• Once again, Region VIII raised more than $500,000 for RP – many thanks to RVC Mike Donovan for his outstanding leadership!

I also want to thank the numerous companies that not only financially support ASHRAE, but also allow their employees to volunteer for ASHRAE during business hours. It is the dedication and commitment of those employees that truly help ASHRAE succeed.

The listing by Region and Chapter that follows lists the names of more than 4,500 investors who have made significant financial commitments to RP during the 2017-2018 fiscal year. The RP Staff strives to be as accurate and complete as possible. Please accept my sincere apology for any omissions or mistakes, and notify myself or RP staff so we can correct them for future publications.

My sincere thanks to each and every one of the 1,000+ investors who invested in ASHRAE RP this past year and could not be listed by name on these pages because of space limitations. Every contribution truly makes a difference.

With the Annual RP Campaign as the basis for all of ASHRAE’s fundraising efforts, the RP Committee looks forward to achieving even greater success in future campaigns.

October 2018

2017–2018 ASHRAE Investor Honor Roll

HR 31
Donors gave more than $2 million for research in 2017–18
ASHRAE matches gifts to research 100%!
ashrae.org/make-a-gift

In 2017-28, ASHRAE Research was used to develop 23 standards.

300+ members are involved in the ASHRAE Research process each year.

100+ technical committees rely on ASHRAE Research.

Since 1967, $5.06 million has been awarded to 637 graduate students from 100 colleges and universities worldwide as part of the Grant-in-Aid program.

In Society Year 2017–18, ASHRAE Research addressed the urgent need for the development of handling guidelines for flammable (A2L) refrigerants with expedited research projects totaling $1.2 million.

ashrae.org/research
ASHRAE thanks the following donors for their loyal support over the decades!

2017–2018 ASHRAE Investor Honor Roll

October 2018
**Andy Boggs: A Life Remembered – A Legacy Defined**

Andrew (Andy) T. Boggs served as ASHRAE's Executive Vice President from 1955 until retiring in 1985. Andy’s engagement and service to ASHRAE is a testament to a dedicated engineer, volunteer, and supporter. World War II interrupted Andy’s education, but he received his degree in chemistry from Norwich University after the war.

After graduation, Andy went to work for the Edison Electric Institute. There had been great development in the application of heat pump technology during World War II. He worked in the development of ground coils, water coils, and their application to the refrigeration industry.

Before there was ASHRAE, there was ASRE (the American Society of Refrigerating Engineers) and ASHAE (the American Society of Heating and Air-Conditioning Engineers). Andy joined ASRE as a staff member in 1955. There was talk at the time of combining ASRE and ASHAE because of the overlap of their missions. After much negotiation, the two societies merged to become what we now know as the American Society of Heating, Refrigeration, and Air Conditioning Engineers (ASHRAE). The name seemed unwieldy at the time, but it stuck!

The newly created ASHRAE was headquartered in New York. It became apparent to Andy and the ASHRAE board that it would be too expensive to stay in New York. As the Executive Vice President, Andy helped select Atlanta as the site of the ASHRAE headquarters and moved into the new building in 1981.

Andy oversaw the explosive growth of ASHRAE beginning in the 1960’s. ASHRAE membership in 1968 was around 23,000 members and 105 chapters, exclusively in the United States. The first international Chapter-at-Large was created in Singapore in 1984. ASHRAE now boasts more than 56,000 members from over 132 nations.

Andy, along with his wife, Marjorie, were involved with ASHRAE for 37 years. He worked with many ASHRAE Presidents and Board Members during his long career. The development of the “word processor,” in Andy’s words, was one of the great innovations that helped ASHRAE manage the growth of its technical committees, standards, and handbooks.

During his life, Andy was a consistent and regular donor to the RP campaign and the Life Members Club. Andy passed away on September 4, 2009 and his wife Marjorie died on January 18, 2017. To the delight of ASHRAE, the Boggs’ made provisions for a gift to ASHRAE in their estate plans. Andy spoke of his pride in helping ASHRAE respond to the demands for energy conservation and its contribution to indoor air quality. His life is a testament to his dedication to the HVAC&R industry.

The estate gift from Mr. and Mrs. Boggs will be used to support critical ASHRAE research. The mission, values, and camaraderie of ASHRAE reflect Andy’s dedication to the HVAC&R profession. His gift will stand as an ongoing legacy of his engagement and devotion to ASHRAE.

If you would like to learn how you can join Andy Boggs and his wife in supporting ASHRAE’s mission with a legacy gift, please contact Margaret Smith at msmith@ashrae.org or (678) 539-1201.

**Heritage Society**

If you have decided to include ASHRAE in your estate plans, we would like to show you our appreciation by including you as a member of ASHRAE’s honorary society, the Heritage Society.

The Heritage Society was established as a means to recognize those individuals who have included ASHRAE in their estate plan via a bequest, charitable remainder trust, charitable gift annuity or other form of planned gift. A planned gift is often the most effective opportunity to ensure a legacy with ASHRAE. They also provide substantial Federal tax deductions, and certain vehicles can provide a lifetime income to you and your loved ones.
