CRITERIA FOR CITY/HOTEL SELECTION FOR AN ASHRAE ANNUAL CONFERENCE

This document, created by the Conferences and Expositions Committee is intended to help the ASHRAE Chapters better understand the general space requirements to be able to host an Annual Conference. The numbers of rooms, size and quantity of spaces, is based on extensive history of past conferences for it to be successful. The quantity of items is important, but so is the arrangement and adjacency of specific spaces. In addition, there are other factors that are taken into account not described within this document – timing of available space and overall cost to the attendee (including average flight cost).

REGIONAL SELECTION

The Conferences and Expositions Committee selects the regional rotation pattern of the conferences. The Conferences and Expositions Committee will make recommendations on the city(ies) within each region with adequate facilities capable of hosting the conference. It becomes the responsibility of the Director and Regional Chair to solicit invitational bids from the chapter(s) located within the city(ies). An ASHRAE Annual Conference will not be scheduled without an official letter of invitation from the chapter.

The Winter Conference site selection is made by the International Exposition Company based on the AHR Expo space requirements.

ASHRAE ANNUAL CONFERENCE SLEEPING ROOM REQUIREMENTS

- Wednesday ................... 45 rooms
- Thursday ..................... 290 rooms
- Friday .......................... 640 rooms
