## CONTENTS

**Host Chapter:** St. Louis ................................. ix

**Program Committee and Transactions Staff** ............................................... ix

**State of the Society by David S. Butler, Sr., ASHRAE 1989-90 President** .......... xi

**Keynote Address** .............................................. xv

**Technical Program Abstracts** ......................................................... xix

### TECHNICAL PAPERS

<table>
<thead>
<tr>
<th>Paper Number</th>
<th>Title</th>
<th>Authors</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>3383</td>
<td>Earth-Coupled Radiant Heating and Cooling System for Hot, Humid Climates by J.M. Akridge, J.P. Cleaveland, and D. Keebaugh</td>
<td></td>
<td>32</td>
</tr>
<tr>
<td>3384</td>
<td>A Theoretical Procedure to Determine Configurations of Sunlit Room Surfaces by M.T. Messadi</td>
<td></td>
<td>39</td>
</tr>
<tr>
<td>3386</td>
<td>A Three-Dimensional Numerical Study of Slab-on-Grade Heat Transfer by W.P. Bahnfleth and C.O. Pedersen</td>
<td></td>
<td>61</td>
</tr>
<tr>
<td>3387</td>
<td>Fundamentals of Simultaneous Heat and Moisture Transfer between the Building Envelope and the Conditioned Space Air by S.P.W. Wong and S.K. Wang</td>
<td></td>
<td>73</td>
</tr>
<tr>
<td>3388</td>
<td>Design and Construction of a University Laboratory for Dynamic Testing of Commercial-Building-Scale HVAC Systems and Their Controls by M.J. Brandemuehl and J.F. Kreider</td>
<td></td>
<td>84</td>
</tr>
<tr>
<td>3390</td>
<td>Energy Impact of Various Inside Air Temperatures and Humidities in a Museum When Located in Five U.S. Cities by J.M. Ayres, H. Lau, and J.C. Haid</td>
<td></td>
<td>100</td>
</tr>
<tr>
<td>3391</td>
<td>Museum Environmental Requirements: A Literature Survey by J.C. Haid, J. Druzik, J.M. Ayres, and H. Lau</td>
<td></td>
<td>112</td>
</tr>
<tr>
<td>3395</td>
<td>An Experimental Method of Approximating Effective Heat Transfer Coefficients for Food Products by W.E. Stewart, Jr., B.R. Becker, M.E. Greer, and L.A. Stickler</td>
<td></td>
<td>142</td>
</tr>
<tr>
<td>3397</td>
<td>The Evaluation of a Falling Film Evaporator in an R22 Chiller Unit by K. Takahashi, T. Daikoku, H. Yasuda, T. Yamashita, and S. Zushi</td>
<td></td>
<td>158</td>
</tr>
<tr>
<td>3400</td>
<td>The Measurement of Solubility and Viscosity of Oil/Refrigerant Mixtures at High Pressures and Temperatures: Test Facility and Initial Results for R-22/Naphthenic Oil Mixtures by N.A. Van Gaalen, M.B. Pate, and S.C. Zoz</td>
<td></td>
<td>183</td>
</tr>
<tr>
<td>3402</td>
<td>Withdrawn</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3403</td>
<td>Heuristic Control Profiles for Integrated Boilers by M. Zaheer-uddin, R.E. Rink, and V.G. Gourishankar</td>
<td></td>
<td>205</td>
</tr>
<tr>
<td>3404</td>
<td>Field Evaluation of a Comfort Meter by M.A. Abdelrahman</td>
<td></td>
<td>212</td>
</tr>
<tr>
<td>3405</td>
<td>The Cost-Effectiveness of Electrically Driven Heat Pumps When Used with a Smart Control System by R.A. Ewers and D.L. Loveday</td>
<td></td>
<td>216</td>
</tr>
<tr>
<td>3406</td>
<td>Regression Analysis of Residential Air-Conditioning Energy Consumption at Doha, Saudi Arabia by D.Y. Abdel-Nabi, S.M. Zubair, M.A. Abdelrahman, and V. Bahel</td>
<td></td>
<td>223</td>
</tr>
<tr>
<td>3407</td>
<td>A Computational Parametric Study of Elementary School Energy Use by B.R. Becker and E.C. Meinking</td>
<td></td>
<td>233</td>
</tr>
<tr>
<td>3408</td>
<td>Combined Energy Balance and Recursive Least Squares Method for the Identification of System Parameters by M. Zaheer-uddin</td>
<td></td>
<td>245</td>
</tr>
<tr>
<td>3409</td>
<td>Stochastic Models of Solar Radiation and Outdoor Temperature by S. Hokol, M. Matsumoto, and M. Kagawa</td>
<td></td>
<td>239</td>
</tr>
<tr>
<td>3410</td>
<td>Measured Effects of Dust on the Performance of Radiant Barriers Installed on Top of Attic Insulation by W.P. Levins and J.A. Hall</td>
<td></td>
<td>253</td>
</tr>
<tr>
<td>3411</td>
<td>Performance Monitoring of an Adsorption Heat Pump: Model Development and Simulation Studies by F. Meunier and T. Zanlé</td>
<td></td>
<td>261</td>
</tr>
<tr>
<td>3412</td>
<td>Performance of Adsorption Heat Pumps: Active Carbon-Methanol and Zeolite-Water Pairs by F. Meunier and N. Douss</td>
<td></td>
<td>267</td>
</tr>
<tr>
<td>3413</td>
<td>Comparison of Three Types of Absorption Heat Pumps Based on Energy Utilization Diagrams by C-C. Chuang and M. Ishida</td>
<td></td>
<td>275</td>
</tr>
</tbody>
</table>
Study of an Absorption Refrigeration System for Simultaneous Cooling and Heating by P. Kumar and S. Devotta ................................................................. 291
An Equation and Computer Program to Determine the Partial Pressure of Water Vapor in the Air between the Dry-Bulb Temperatures of -50°F and +2°F by F.A. Sando ......................................................... 299
Techniques for Obtaining Improved Initial Estimates of Explicit State Variables for Computer-Based Thermodynamic Property Routines by J.M. Hill and S.M. Jeter .............................................. 309
Real Gas Critical Flow Factors for R-12, R-22, and R-502 by S.P. Schumann .......................................................................................................................... 329
An Approach to Determining the Required Response Time for a VAV Fume Hood Control System by O. Ahmed and S.A. Bradley .............................................................................................................. 337
Numerical Study of Flow and Contaminant Diffusion Fields as Affected by Flow Obstacles in Conventional-Flow-Type Clean Room by S. Murakami, S. Kato, and Y. Suyama ................................................................................................................. 343
Rating of Gravity Roof Ventilator Draft by D.F. Elger and E.T. McLam .......................................................................................................................... 356
Numerical Simulation of the Performance of Building Ventilation Systems by J.B. Fang and R.A. Grot ........................................................................................................ 361
Variable-Air-Volume Ventilation Systems for Industrial Buildings by A.M. Zhivov .................................................................................................................. 367
Fire Tower Tests of Stair Pressurization Systems with Overpressure Relief (RP-559) by G.T. Tamura ...................................................................................................................... 373
Field Experiments of Zoned Smoke Control at the Plaza Hotel in Washington, D.C. (RP-504) by J.H. Klotz .......................................................................................................................... 399
Desuperheater Water-Heater and Air-to-Air Heat Pump System: Representative Performance Data by M.L. D'Valentine and V.W. Goldschmidt ............................................................................................................. 417
Development of a Hot Water Use Data Base by B.R. Becker and K.E. Stogsdill .......................................................................................................................... 422
Performance of Fume Hoods in Simulated Laboratory Conditions by G. Schuyler .................................................................................................................. 428

SYMPOSIUM PAPERS

SL-90-1 Heat Transfer of Enhancement in Refrigeration and Air Conditioning Applications
The Effects of Different Fin Configurations on the Performance of Finned-Tube Heat Exchangers under Frosting Conditions by S.N. Kondepudi and D.L. O'Neal ................................................................. 439
Air-Side Heat Transfer Correlations for Flat and Wavy Plate Fin-and-Tube Geometries by R.L. Webb .................................................................................................................. 445
An Experimental Investigation of Heat Transfer Characteristics of Spirally Fluted Tubes in Confined Cross-Flow by S. Garimella, R.N. Christensen, M.A. Garrabrant, and M.E. Boos ........................................................................................................ 450
Gas-Liquid Flow Patterns in Refrigerant-Oil Mixtures by S.P. Manwell and A.E. Bergles .................................................................................................................. 456
Oil Quantity Measurements in Smooth and Micro-Fin Tubes during Evaporation and Condensation of Refrigerant-Oil Mixtures (RP-469) by L.M. Schlager, M.B. Pate, and A.E. Bergles ................................................................................................................. 465

SL-90-2 Artificial Intelligence in Building Design: Progress and Promise—Part 1
ICADS: An Intelligent Computer-Aided Design Environment by J. Pohl, L. Myers, and A. Chapman ........................................................................................................ 473
Modeling the Building Design Process and Expertise by K.M. Papamichael and S.E. Selkowitz .................................................................................................................. 481
Building Envelope Design Using Design Prototypes by K.W. Tham, H.S. Lee, and J.S. Gero .................................................................................................................. 508

SL-90-3 Artificial Intelligence in Building Design: Progress and Promise—Part 2
Intelligent Computer Programs for Building Services Engineering Design by V.C. Thomas ........................................................................................................ 523
Desirable Interface Characteristics of Knowledge-Based Energy Software Used by Architects by G.Z. Brown ........................................................................................................ 550
An Expert System for Window Safety Glazing Design by R.V. Foes and D.H. Droste .................................................................................................................. 563

SL-90-4 Building Energy Retrofit Performance Monitoring
Effectiveness of an Air Conditioner Replacement Program in Austin, Texas by R.E. Hough and P.R. Burns ........................................................................................................ 580
Visible Barrier Field Tests in Army Family Housing Units at Fort Benning, Georgia by W.P. Levins and D.L. Herron ........................................................................................................ 589
Energy Savings and Performance of an Improved Energy Efficiency Measure Selection Technique by M.P. Ternes ........................................................................................................ 598
SL-90-5 Semiconductor HVAC Systems for Cleanrooms, Design Concepts and Operating Strategies for Improving Operating Efficiency
Makeup Air Systems Energy-Saving Opportunities by W.K. Brown ................................................. 609
Fan Efficiency vs. Unit Efficiency for Cleanroom Application by E. Hunt, D.E. Benson, and L.G. Hopkins 616
HVAC Systems for Semiconductor Cleanrooms—Part 1: System Components by P. Naughton ............. 620
HVAC Systems for Semiconductor Cleanrooms—Part 2: Total System Dynamics by P. Naughton .......... 625

SL-90-6 Developments in HVAC Education
Development of a System-Design-Oriented HVAC/Energy Curriculum by R.C. Alexander .................. 637
A Computer-Aided Design (CAD) Package for Teaching HVAC Design by D.B. Meredith and W.J. Wolfe 643
Analysis of Cooling and Dehumidifying Coils Using Spreadsheets by S.A. Sheriff and B.E. Barkdoll .... 648
Chilled-Water Loop Optimization by W.J. Wepfer and S.V. Shelton .............................................. 656

SL-90-7 Raised Floor Air Distribution—The International Experience
Raised Floor Air Distribution—A Case Study by D. Arnold ............................................................. 665
Low-Pressure Underfloor HVAC System by H.J. Spoormaker .......................................................... 670
Task Conditioning for the Workplace: Issues and Challenges by K.E. Heinemeier, G.E. Schiller, and C.C. Benton ................................................................. 678
The Underfloor Air Supply System—The European Experience by F. Sodec and R. Craig .................. 690
Thermal Comfort with Underfloor Air-Conditioning Systems by H. Hanzawa and Y. Nagasawa ........... 696

SL-90-8 Smoke Control Technology
See also Technical Papers 3426 and 3427
Smoke Management in Large Spaces—Sizing Smoke Vents, Flow Rates, and Temperatures by B.A. Borresen and C.N. Madsen ........................................................................................................ 701
Method for Ascertaining Smoke Leakage through Small Openings Using Tracer Gas by T. Yamada ...... 707
See also Technical Papers 3428 and 3429

SL-90-9 Additional Design Data for Service Water Heating
See also Technical Paper 3430
Water Storage Tank Size Requirements for Residential Heat Pump/Air-Conditioner Desuperheater Heat Recovery by R.E. Cook .................................................................................................... 715
See also Technical Paper 3431

SL-90-10 Artificial Intelligence and Advanced Topics for HVAC System Diagnostics
Prediction of Thermal Storage Loads Using a Neural Network by F.J. Ferrano, Jr. and K.V. Wong .......... 723
Control of a Simulated Dual-Temperature Hydronic System Using a Neural Network Approach by Y. Ding and K.V. Wong ........................................................................................................ 727
Embedded Expert System Development for Monitoring Packaged HVAC Equipment by G.M. Kaler, Jr. ................................................................................................................................. 733
Automatic Analysis and Correction of HVAC System Simulated Performance: A Cooling Coil Case Study by J.A. Wright and L. Boughazi ........................................................................... 743

SL-90-11 Industrial Ventilation: Laboratory and Process Exhaust Systems
See also Technical Paper 3432
Variable-Volume Fume Hoods: User Experience in a Chemistry Research Laboratory by M.D. McDiarmid ................................................................. 753
Using Low-Velocity Air Patterns to Improve the Operator’s Environment at Industrial Work Stations by L.A. Chamberlin ......................................................................................................................... 757
Development of Loss Coefficient Data for Compound Exhaust Hoods Using Slots for Air Distribution (RP-524) by P.E. Geisberger and B.E. Sibbitt ........................................................................... 763

SL-90-12 Recent Research in Lighting/HVAC Interaction
Experimental Evaluation of Lighting/HVAC Interaction by S.J. Treado and J.W. Bean ......................... 773
A Numerical Lighting/HVAC Test Cell by E.F. Sowell ...................................................................... 780
Considerations in Developing a Transient Heat-from-Lights Design Tool by R.A. Rundquist .............. 787

SL-90-13 New Techniques in Chiller Control
Direct Digital Control of a Large Centrifugal Chiller by A.L. Utesch ............................................... 797
Microprocessor Control of Centrifugal Chillers—New Choices by M.A. Lewis ................................. 800
Near-Optimal Control of Cooling Towers for Chilled-Water Systems by J.E. Braun and G.T. Diderrich ................................................................. 806

SL-90-14 Building Operation Dynamics—Part 1
Controllability—Back to Basics by B.A. Borresen and A. Grindal .................................................... 817
Use of Building Thermal Mass to Offset Cooling Loads by M.D. Ruud, J.W. Mitchell, and S.A. Klein 820
Cooling Cost Minimization Using Building Mass for Thermal Storage by M.E. Snyder and T.A. Newell 830
A Methodology for Building Thermal Dynamics Studies and Control Applications by A.K. Athienitis, M. Stylianou, and J. Shou ........................................................................................................... 839
Central Forced Air Heating and Cooling Performance and Sizing
Selecting Residential Air-Cooled Cooling Equipment Based on Sensible and Latent Performance by H. Rutkowski and J.H. Healy ................................................................. 851
The Effects of Changes in Fuel Quality and Burner Technology on Oil Furnace Performance by S.W. Lee and A.C.S. Hayden ................................................................. 857
Chimney-Related Energy Losses in Residential Oil-Fired Heating Systems by T. Butcher, Y. Celebi, R. Krajewski, and J. Tatey ................................................................. 862

Building Operation Dynamics–Part 2
Reducing Energy Costs and Peak Electrical Demand through Optimal Control of Building Thermal Storage by J.E. Braun ................................................................. 876
Chimney-Related Energy Losses in Residential Oil-Fired Heating Systems by T. Butcher, Y. Celebi, R. Krajewski, and J. Tatey ................................................................. 889
Adaptive Robust Control Scheme Applied to a Single-Zone HVAC System by Y.H. Chen and K.M. Lee ................................................................. 896

Alternative Fuels for District Heating and Cooling
Municipal Waste Incineration–An Environmentally Benign Energy Source for District Heating by L.E. Astrand ........ 907
An Overview of U.S. Geothermal District Heating Systems by K.D. Rafferty ................................................................. 912
Municipal Garbage/Trash as a Viable Fuel for DHC Systems by J.I. Levenhagen ................................................................. 919

SOCIETY BUSINESS
1989-90 ASHRAE Officers, Directors, Committee Members and Staff ................................................................. 929
ASHRAE Chapter Officers ................................................................. 932
ASHRAE Technical Committees and Task Groups ................................................................. 934
ASHRAE Standards Project Committees ................................................................. 948
ASHRAE Past Meetings ................................................................. 953
Society Presidents ................................................................. 954
ASHRAE Honors and Awards ................................................................. 955
ASHRAE Intersociety Representatives ................................................................. 962
ASHRAE International Associates ................................................................. 963
In Memoriam ................................................................. 964
Index of Technical and Symposium Papers, Volume 96, Part 2 ................................................................. 967
