Weather Data Viewer 6.0 Features

The interface shows input cells in green.

Stations can be selected by Region/County, WMO Station Number, or Latitude/Longitude.

The Station Summary information updates automatically as the station is selected.

After the parameters have been selected (right side), the blue link for Retrieve data (bottom left) results in the station’s data from 2017 ASHRAE Handbook—Fundamentals (see below).

The DVD includes Climatic Design Data in Excel format for all 8118 locations in the ASHRAE Handbook.
Please see the screen shots below for previews of the Station finder and bin data features.
