PUBLIC REVIEW—CALL FOR COMMENTS

Constructive comments are invited for the following Public Review Drafts, which can be accessed on ASHRAE's website at <https://osr.ashrae.org>. To obtain a paper copy of any Public Review Draft contact ASHRAE, Inc. Attn: Standards Public Review, 1791 Tullie Circle, NE, Atlanta, GA 30329-2305, or via email at: standards.section@ashrae.org. Paper copies are \$35.00/copy if 100 pages or less and \$45.00 if over 100 pages.

30-day Public Review from May 17, 2019 to June 16, 2019

♦ **1st Public Review of BSR/ASHRAE Addendum *ao* to ANSI/ASHRAE Standard 62.1-2016, *Ventilation for Acceptable Indoor Air Quality***

The committee received a change proposal to modify the title of the standard. After discussion in the Atlanta meeting in January 2019 the committee recommends that changing the word "for" in the title to the word "and" more accurately describes the current content of the standard because many requirements are not ventilation. Those requirements are for acceptable indoor air quality.

♦ **1st Public Review of BSR/ASHRAE/USGBC/IES Addendum *ac* to ANSI/ASHRAE/USGBC/IES Standard 189.1-2017, *Standard for the Design of High-Performance Green Buildings Except Low-Rise Residential Buildings***

Addendum *ac* limits the automated demand response (DR) requirements in Section 7 – Energy Efficiency, to only those regions where a demand response program is available. This addendum also includes a new definition – gross conditioned floor area – and excludes buildings with a gross conditioned floor area less than 5,000 ft² (500 m²) from the DR requirements.

45-day Public Review from May 17, 2019 to July 1, 2019

♦ **1st Public Review of BSR/ASHRAE/USGBC/IES Addendum *ab* to ANSI/ASHRAE/USGBC/IES Standard 189.1-2017, *Standard for the Design of High-Performance Green Buildings Except Low-Rise Residential Buildings***

PUBLIC REVIEW—CALL FOR COMMENTS

Addendum *ab* adds external view requirements as a jurisdictional option in Section 8 – Indoor Environmental Quality. Where this option is selected, buildings are required to provide a view of the outdoors or an interior atrium from 50% of the floor area in offices, classrooms, and patient rooms.
