### 30-day Public Review from October 25, 2019 to November 24, 2019

- **1st Public Review of ASHRAE Addendum e to ASHRAE Guideline 28-2016, Air Quality within Commercial Aircraft**
  Proposed Addendum e provides conversion factors to be used in concentration calculations detailed in ASHRAE Guideline 28 edition 2016. This is a revision to Table 4.1.1 (Conversion Factors for Concentrations Calculations) and will be included in later revisions of Guideline 28.

  This addendum makes changes to Section 4.1 and updates the Normative References.

  This proposed addendum adds requirements and language similar to those required in Section 5 (Systems and Equipment) of ASHRAE Standard 62.1. Requirements include: (1.) Air intake separation distance table adapted for 170 requirements. (2.) Outdoor air verification requirements while operating. (3.) Measures to prevent vehicle combustion in parking garages from entering the building. (4.) Air balancing requirements.
