ASHRAE Standing Standard Project Committee 34
Cognizant TC: 3.1, Refrigerants and Secondary Coolants
SPLS Liaison: Drury Crawley
Staff Liaison: Brian Cox

Debra H. Kennoy*, Chair
Sean Cunningham*, Vice-Chair
Warren Clough*
Gary W. Jepson*
Jay A. Kohler*
Stephen Kujak*
Scott MacLeod*
Julie Majurin*
Chun-cheng Piao*
Marc Scancarello*
Christopher Seeton*

John Senediak*
Eric M. Smith*
Ganesan "Sonny" Sundaresan*
Kenji Takizawa*
Samuel F. Yana-Motta*
Paul H. Dugard
Brian A. Frice
Mary Koban
Tatsuro Kobayashi
William Kopko
Andrew Kusmierz

Evan Laganis
Thomas J. Leck
Michael Maynard
Robert G. Richard
David L. Rule
George M. Rusch
Valerie Shultz
Jian Sun-Blanks

* Denotes members of voting status when the document was approved for publication

ASHRAE STANDARDS COMMITTEE 2017–2018

Steven J. Emmerich, Chair
Donald M. Brundage, Vice-Chair
Niels Bidstrup
Michael D. Corbat
Drury B. Crawley
Julie M. Ferguson
Michael W. Gallagher
Walter T. Grondzik
Vinod P. Gupta
Susanna S. Hanson

Roger L. Hedrick
Rick M. Heiden
Jonathan Humble
Srinivas Katipamula
Kwang Woo Kim
Larry Kouma
Arsen K. Melikov
R. Lee Millies, Jr.
Karl L. Peterman
Erick A. Phelps

David Robin
Peter Simmonds
Dennis A. Stanke
Wayne H. Stoppenmoor, Jr.
Richard T. Swierczyna
Jack H. Zarour
Lawrence C. Markel, BOD ExO
M. Ginger Scoggins, CO

Stephanie C. Reiniche, Director of Technology

SPECIAL NOTE
This American National Standard (ANS) is a national voluntary consensus Standard developed under the auspices of ASHRAE. Consensus is defined by the American National Standards Institute (ANSI), of which ASHRAE is a member and which has approved this Standard as an ANS, as “substantial agreement reached by directly and materially affected interest categories. This signifies the concurrence of more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that an effort be made toward their resolution.” Compliance with this Standard is voluntary until and unless a legal jurisdiction makes compliance mandatory through legislation.

ASHRAE obtains consensus through participation of its national and international members, associated societies, and public review. ASHRAE Standards are prepared by a Project Committee appointed specifically for the purpose of writing the Standard. The Project Committee Chair and Vice-Chair must be members of ASHRAE; while other committee members may or may not be ASHRAE members, all must be technically qualified in the subject area of the Standard. Every effort is made to balance the concerned interests on all Project Committees.

The Senior Manager of Standards of ASHRAE should be contacted for
a. interpretation of the contents of this Standard,
b. participation in the next review of the Standard,
c. offering constructive criticism for improving the Standard, or
d. permission to reprint portions of the Standard.

DISCLAIMER
ASHRAE uses its best efforts to promulgate Standards and Guidelines for the benefit of the public in light of available information and accepted industry practices. However, ASHRAE does not guarantee, certify, or assure the safety or performance of any products, components, or systems tested, installed, or operated in accordance with ASHRAE’s Standards or Guidelines or that any tests conducted under its Standards or Guidelines will be nonhazardous or free from risk.

ASHRAE INDUSTRIAL ADVERTISING POLICY ON STANDARDS
ASHRAE Standards and Guidelines are established to assist industry and the public by offering a uniform method of testing for rating purposes, by suggesting safe practices in designing and installing equipment, by providing proper definitions of this equipment, and by providing other information that may serve to guide the industry. The creation of ASHRAE Standards and Guidelines is determined by the need for them, and conformance to them is completely voluntary.

In referring to this Standard or Guideline and in marking of equipment and in advertising, no claim shall be made, either stated or implied, that the product has been approved by ASHRAE.
FOREWORD

This addendum adds the single-component refrigerant R-1132a to Tables 4-1, D-1, and E-1.

Note: In this addendum, changes to the current standard are indicated in the text by underlining (for additions) and strikethrough (for deletions) unless the instructions specifically mention some other means of indicating the changes.

Addendum f to Standard 34-2016

Add the following underlined data to Tables 4-1, D-1, and E-1 in the columns indicated.

TABLE 4-1 Refrigerant Data and Safety Classifications
Refrigerant Number = R-1132a
Chemical Name = 1,1-difluoroethylene
Chemical Formula = \( \text{CF}_2 = \text{CH}_2 \)
OEL = 500 ppm v/v
Safety Group = A2
RCL = 13,000 ppm v/v; 2.0 lb/Mcf; 33 g/m³
Highly Toxic or Toxic Under Code Classification = Neither

TABLE D-1 Refrigerant Data
Refrigerant Number = R-1132a
Chemical Name = 1,1-difluoroethylene
Chemical Formula = \( \text{CF}_2 = \text{CH}_2 \)
Molecular Mass = 64.0 g/mol
Normal Boiling Point (°F) = –122.5
Normal Boiling Point (°C) = –86.7

TABLE E-1 Toxicity Table for Standard 34—ATEL, ODL, FCL, and RCL Values for Single-Compound Refrigerants (ppm v/v)
Refrigerant R- = R-1132a
Chemical Name = 1,1-difluoroethylene
LC₅₀ = 100,000 ppm
Cardiac Sensitization
LOEL = ND
NOEL = 50,000 ppm
Anesthesia
EC₅₀ = ND
LOEL = ND
NOEL = 200,000 ppm
Other = ND
ATEL = 28,000 ppm
ODL = ND
FCL = 13,000 ppm
RCL = 13,000
LFL = 50,000 ppm
ATEL Source = 28.3% LC₅₀
RCL Source = 25% LFL
ASHRAE is concerned with the impact of its members' activities on both the indoor and outdoor environment. ASHRAE’s members will strive to minimize any possible deleterious effect on the indoor and outdoor environment of the systems and components in their responsibility while maximizing the beneficial effects these systems provide, consistent with accepted Standards and the practical state of the art.

ASHRAE’s short-range goal is to ensure that the systems and components within its scope do not impact the indoor and outdoor environment to a greater extent than specified by the Standards and Guidelines as established by itself and other responsible bodies.

As an ongoing goal, ASHRAE will, through its Standards Committee and extensive Technical Committee structure, continue to generate up-to-date Standards and Guidelines where appropriate and adopt, recommend, and promote those new and revised Standards developed by other responsible organizations.

Through its Handbook, appropriate chapters will contain up-to-date Standards and design considerations as the material is systematically revised.

ASHRAE will take the lead with respect to dissemination of environmental information of its primary interest and will seek out and disseminate information from other responsible organizations that is pertinent, as guides to updating Standards and Guidelines.

The effects of the design and selection of equipment and systems will be considered within the scope of the system’s intended use and expected misuse. The disposal of hazardous materials, if any, will also be considered.

ASHRAE’s primary concern for environmental impact will be at the site where equipment within ASHRAE’s scope operates. However, energy source selection and the possible environmental impact due to the energy source and energy transportation will be considered where possible. Recommendations concerning energy source selection should be made by its members.
About ASHRAE

ASHRAE, founded in 1894, is a global society advancing human well-being through sustainable technology for the built environment. The Society and its members focus on building systems, energy efficiency, indoor air quality, refrigeration, and sustainability. Through research, Standards writing, publishing, certification and continuing education, ASHRAE shapes tomorrow’s built environment today.

For more information or to become a member of ASHRAE, visit www.ashrae.org.

To stay current with this and other ASHRAE Standards and Guidelines, visit www.ashrae.org/standards.

Visit the ASHRAE Bookstore

ASHRAE offers its Standards and Guidelines in print, as immediately downloadable PDFs, on CD-ROM, and via ASHRAE Digital Collections, which provides online access with automatic updates as well as historical versions of publications. Selected Standards and Guidelines are also offered in redline versions that indicate the changes made between the active Standard or Guideline and its previous version. For more information, visit the Standards and Guidelines section of the ASHRAE Bookstore at www.ashrae.org/bookstore.

IMPORTANT NOTICES ABOUT THIS STANDARD

To ensure that you have all of the approved addenda, errata, and interpretations for this Standard, visit www.ashrae.org/standards to download them free of charge.

Addenda, errata, and interpretations for ASHRAE Standards and Guidelines are no longer distributed with copies of the Standards and Guidelines. ASHRAE provides these addenda, errata, and interpretations only in electronic form to promote more sustainable use of resources.
