

## ASHRAE Technical FAQ

---

ID 43

---

Question Where can I get historic weather data for a particular time period to show that it was unusually hot or cold?

---

Answer The National Climatic Data Center ([NCDC - www.ncdc.noaa.gov](http://www.ncdc.noaa.gov)) Climate at a Glance web site (<http://lwf.ncdc.noaa.gov/oa/climate/research/cag3/cag3.html>) specifically provides information for the U.S. on the monthly comparisons with normal climate conditions.

Web sites of countries' National Meteorological Services may also have such data.

Some local gas and/or electric utilities maintain this information for their service areas.
