IN CASE OF EMERGENCY

Plan ahead—when you reach your destination, check the location of exits. Walk to the nearest exit; learn the route, obstacles, etc.

CAESARS PALACE

Dial 0 from any hotel phone and ask the operator for Emergency Security Assistance or call (702) 731-7266 from any personal phone. If 911 is called, please also notify the hotel to assist when emergency services arrive on property. If speaking to 911 dispatch, make sure you specify the location as “Caesars Palace” as there are several Caesars properties in Las Vegas.

The address for **Caesars Palace** is **3570 S Las Vegas Blvd.**

Caesars Palace's Security Officers are CPR, Defibrillator and First Aid certified. The security dispatch room has a direct line with the Police and Fire Department, as well as Medical Emergency Services.

In the event of an emergency, the hotel or facility alarms, both visual and audible, will sound. An announcement will follow stating that the alarm you are hearing is being investigated and to remain where you are and calm until further notice. This same announcement will repeat as the alarm is being investigated. If the alarm is resolved or false, the announcement will state that the alarm has been “investigated and resolved” and to return to your normal operations. If there is credibility to the alarm, the announcement will state that the hotel or facility is being evacuated and to proceed to the nearest emergency exit detailed in our Emergency Evacuation Plan.

LVCC NORTH AND CENTRAL HALLS

In the event of an emergency, please call (702) 892-7400 or 7400 from an LVCC house phone. Las Vegas Convention Center Security should be the first point of contact for any emergency. Calling “911” by individual attendees delays response to an emergency. Las Vegas Convention Center Security should always be called first.

The LVCC Security Office is in the Central Lobby and is staffed 24 hours a day.

All Las Vegas Convention Center Security first responders are certified in CPR and AED.

North and Central Hall First Aid Stations are in the following locations and can be reached by calling (702) 892-7400.

- Near LVCC Security Office, north side of the Central Concourse between Freight Door 11 on the North and Hall C3 on the South
- Opposite Doors of North Plaza Entrance between Freight Doors 3A & 3B

SAFETY TIPS

Street Safety. The streets of any city at any time can be unsafe. When you leave your hotel to go out during the day or the evening, make sure you take off your badge. Wearing a badge is an advertisement that you are a visitor to the city and that you are probably unfamiliar with your location.

Walk “smart” when you leave the convention site —know your destination and the best way to reach it. Walk along lighted sidewalks at night and don’t walk alone. Trust your instincts—if you’re uncomfortable with a situation, get out of it.

Hotel Safety. Don’t answer the door in a hotel room without verifying who it is. If a person claims to be an employee, call the front desk and ask if a staff person is supposed to have access to your room and for what purpose. Use the hotel safe-deposit box. When you’re in your hotel room, use all the locking devices provided. Don’t reveal your room number or discuss plans for leaving the hotel within earshot of strangers.

LOCAL RECOMMENDATIONS FOR THINGS TO DO IN LAS VEGAS

Stop by the Host Committee desk in Augustus I/II on the Emperors level inside ASHRAE Registration and Bookstore. The Las Vegas host committee will provide “Things to Do” recommendations as well as local restaurants.

Here is a list of the Las Vegas Host Committee members’ favorite things to do, see and eat while in Vegas! Locals know best.

Restaurants

- **Delmonicao Steakhouse:** located at Venetian but amazing steaks and family size sides
- **Beer Park at the Paris:** second floor view and has picnic style seating. Location is great for beers and watching sports.
- **Nora’s Italian Kitchen:** noracuisine.com
- **Le Thai:** lethaivegas.com
- **Monzu Italian Oven:** Great pizza monzulv.com
- **Sand Dollar Lounge:** Great live music and cocktails thesanddollarlv.com

Experiences and Entertainment

- **The Mob Museum:** themobmuseum.org
(see page 50 for info on our featured tour!)
- **Immersive Van Gogh Exhibit:** vangoghvegas.com
- **Peppermill:** Old feel of Vegas but has great drinks and food. Overall experience of being somewhere different (\$\$\$)
- **Circa Hotel:** Located downtown. Sunday would be a good day to walk Fremont street, but the sports bar is the largest! This would be the place to watch all Pro Football playoff games along with sports gambling.
- **Escape Room:** The one at town square is amazing and fun.
- **Virtual Reality (VR) Experiences:** MGM Grand has a great experience through Zero Latency. There are multiple options to choose from on the gaming scenario but the zombie one is great with a group of friends.
- **Red Rock Canyon:** redrockcanyonlv.org (car needed!)

Keynote Address	Ann Daniels, record-breaking polar explorer

Polar Explorer Ann Daniels is a world record holder and one of Britain's leading female explorers. Starting out as a mother of young triplets and without any outdoor experience whatsoever, pure hard work and belief led her to being selected from over 200 more experienced women to take part in her first North Pole expedition. From these humble beginnings, she went on to conquer the South Pole and in 2002, became the first woman in history to ski to the

North and South Poles as part of all women teams. Experiencing temperatures as low as -50C and dealing with various encounters with Polar bears, she has sledge-hauled over 2000 miles, in the most inhospitable environments in the world, completing over 10 polar expeditions and surviving over 400 days on the ice. She understands the importance of good planning, hard work and a positive attitude in the most difficult circumstances. As a Polar guide and the only leader of all 3 Catlin Arctic surveys she is living proof that good leadership, teamwork and believing in yourself does make a difference.

Her most recent expeditions in 2017 and 2018 saw Ann working with NASA and the European Space Agency to help scientists understand what is happening in the fragile polar ice cap. She has some exciting projects coming up soon including two major expeditions and a TV drama documentary series.

Her achievements have been recognized by many bodies including the Guinness Book of Records, The Pride of Britain Awards, The Foreign Office and the Women of the Year Awards. She has appeared on TV and radio and along with bringing up her four children is currently working on her next North Pole venture.

TECHNOLOGY FOR SUSTAINABLE OPERATIONS: HOW INCORPORATING SUSTAINABILITY INTO YOUR DIGITIZATION STRATEGY DRIVES HVAC EFFICIENCIES AND BRAND VALUE

The definition of sustainability is changing – from a compliance requirement to a means of creating long-term strategic value within an organization. The operation of commercial and industrial buildings account for 40 percent of electricity consumed globally, and 20 percent of greenhouse gas emissions (GHG). HVAC alone can represent over 30% of this consumption. Incorporating sustainability into a building's digitization strategy gives the ability to not only manage and reduce the energy consumption of HVAC systems but to create operational efficiencies and business resilience and agility. This presentation discusses strategies to attack waste at every level within a building, and how sustainability and digitization can be a driving force to improving P&L.

TIPS FOR FIRST TIME ATTENDEES

ASHRAE conferences provide opportunities for you to learn about the latest technology in the HVAC&R industry, express your opinion about controversial issues, explore new applications for fundamental ideas, to meet the people behind those ideas and to help shape the Society that serves your profession.

If this is your first time attending, you may have questions about what is available to registered attendees. Here are a few tips to help you navigate the conference.

Technical Program

The technical program for the ASHRAE Conference includes paper sessions, seminars, panels, workshops and forums. Check the program book or ASHRAE 365 app to see what you want to attend. You can jump between sessions if you want to hear one specific presentation in each session. Volunteers will be at the door checking and scanning badges.

See page 59 for descriptions of the different types of sessions available within the Technical Program.

All registered attendees receive access to the Virtual Environment that includes recordings of the live streamed sessions with the ability to take a quiz and download a PDH certificate. The Virtual Environment includes downloadable copies of the Conference Papers and links to the On-Demand Sessions which are PowerPoint presentations with audio descriptions of all sessions that were presented during the conference.

Each hour attended in a session equals one PDH. For forums and other one-hour sessions, you must be present for the entire 50-minute program to earn a PDH. State PDHs, AIA LUs and LEED AP credits are awarded for select sessions. Sign-in sheets for attendees to complete to be awarded AIA credit in approved sessions will be available. Also, certain sessions may be acceptable for ASHRAE certification renewal. Send questions to certification@ashrae.org. Your badge will be scanned as you enter the session and a summary of sessions attended will be emailed to you upon conclusion of the conference.

See pages 16 for more information about the Technical Program and Hybrid opportunities.

Advancing the Industry: Committee Meetings

The technical expertise of ASHRAE is concentrated in its technical committees, task groups, technical resource groups and multidisciplinary task groups, which are responsible for preparing the ASHRAE Handbook volumes, initiating and supervising Society research projects, presenting programs at ASHRAE conferences, reviewing technical papers and evaluating the need for standards.

To be a member of a technical committee (TC), you must be active in the field addressed by the committee. You do not have to be an ASHRAE member to participate in a technical committee, nor do you have to be a member of a technical committee to attend committee meetings.

Standards project committees (SPCs) and Guideline project committees (GPCs) are appointed specifically by the Standards Committee to develop and revise standards and guidelines to reflect technical advances in the areas that they cover. To qualify for membership in a committee, you should be knowledgeable in the discipline of the proposed standard and need to apply to the committee.

A schedule of all meetings is included in the conference program on pages 91-112 and the ASHRAE 365 app. Attendance at TC, SPC, and GPC meetings is open to any interested party.

Support Services

The ASHRAE Bookstore and membership booth are set up on site to offer conference participants the latest information about the industry and to answer questions concerning ASHRAE membership.

ASHRAE publications, including books and standards are available for sale in the ASHRAE Bookstore. Located in the registration area, the bookstore features publications devoted entirely to the HVAC&R industry. Selected titles from ASHRAE's publications catalog, as well as a variety of new publications and books from allied organizations are on display. You can browse and purchase publications on site, or you may wish to order several items and have them shipped to you at a later date. If you prefer, you can examine publications in the store and then use the online bookstore at ashrae.org/bookstore to order print and/or digital editions.

The Membership Desk is located in the registration area. Membership applications are available, as well as brochures about the HVAC&R industry and information on student membership. Conference registrants paying the non-member registration fee receive an automatic complimentary year of Society membership.

Networking: Get Involved

ASHRAE conferences and meetings provide an international setting for attendees to gather and exchange ideas. Opportunities to get involved range from presenting a paper to participating in a seminar or attending committee meetings. By reviewing your program and planning ahead, you can ensure that the conference will be a success instead of a series of missed opportunities. Attend events to get to know other members and attendees. *Event details are on pages 31-38.*

See page 16 for more information about networking opportunities with virtual attendees using the Virtual Environment.

Technical Tours

RESORTS WORLD CENTRAL PLANT

Sunday, January 30 | 3:00 – 5:00 pm | \$35

Join ASHRAE for a technical tour of The Resorts World central utility plant. The plant has an interesting history. It started its life in 2007 as part of the failed Echelon construction project. Due to the Great Recession, the planned low-rise hotel tower construction was stopped at the foundation after the central plant was 80% constructed with major equipment in place. Fast-forward to 2016 when the property was bought, and the preliminary plans were in place. The questions to the new Engineer of Record were:

1. Is the 24,000-ton central plant large enough for the planned Resorts World project?
2. Will the equipment be functional after sitting idle for more than a decade?

Join this tour to learn the answers to the two key questions and view the completed Resorts central utility plant.

PLANET 13 MARIJUANA PRODUCTION AND CULTIVATION FACILITIES

Monday, January 31

Tour 1: 2:30 – 4:00 pm | Tour 2: 4:00 – 5:30 pm | \$35

Discover how the marijuana industry utilizes C1D1 rated systems to provide Butane and Ethanol THC Extraction and Distillation, infusion technology including brewery/beverage creation and packaging, gummy candy kettle use and chocolate bar molding and cooling tunnels. Be prepared to suit up in laboratory gown, foot booties and a hair net to experience a GMP facility with the master scientist behind it all. Tour capacity is limited.

SNWA'S RIVER MOUNTAINS WATER TREATMENT FACILITY

Tuesday, February 1 | 1:30 – 4:30 pm | \$35

The River Mountains Water Treatment Facility began delivering treated Colorado River water from Lake Mead to the Las Vegas valley in 2002. Currently, the facility can treat up to 300 million gallons of water per day but was designed to expand to meet Southern Nevada's needs.

This technical tour of the Southern Nevada Water Authority's River Mountains Water Treatment Facility includes a Treatment Tour, a tour of the Water Quality Lab and the Research and Development Lab.

Tour attendees will be required to provide copies of drivers licenses or passports for security clearance one week prior to the visit.

2022 WINTER CONFERENCE TECHNICAL PROGRAM

Earn professional development hour (PDH) credits by attending sessions listed in the Technical Program. Each hour attended in a session equals one PDH. For forums and other one-hour sessions, you must be present for the entire 50-minute program to earn a PDH. Sign in sheets will be available in all session rooms for attendees to complete. State PDHs, AIA LUs and LEED AP credits are awarded for select sessions.

Types of Sessions Presented

Paper Sessions. These sessions present both technical and conference papers. Conference papers are written on current applications or procedures, as well as papers reporting on research in process. These papers differ from technical papers in that they are shorter in length and undergo a much less stringent peer review. Technical papers cover current applications or procedures, as well as papers resulting from research on fundamental concepts and basic theory. Papers presented in these sessions have successfully completed a rigorous peer review. You are invited to comment on these papers. Comments may be submitted via an online form on ashrae.org/2022Winter. PowerPoint presentations with audio descriptions of the presentations are posted online in the Virtual Conference. Preprints of the papers are available to all attendees who have purchased a conference registration.

Forums. Forums are “off-the-record” discussions held to promote a free exchange of ideas. Reporting of forums is limited to allow individuals to speak confidentially without concern of criticism. There are no papers attached to these forums.

Panels. Panel discussions can feature a broad range of subjects and explore different perspectives on issues in the industry. A panel may feature discussions about integrated project delivery among designers, builders and facility management professionals.

Seminars. Seminars feature presentations on subjects of current interest. Papers are not available from the Society; however, seminar PowerPoint presentations with audio descriptions of the presentations are posted online in the Virtual Conference. Access is free for attendees who purchase a conference registration. Seminars are available as a collection via subscription to the Technology Portal online and include video files synched with audio, audio files and PDF files of the presentations.

Workshops. Workshops enable technical committees and other ASHRAE committees to provide a series of short presentations on a topic requiring specific expertise. These short presentations are provided with an increased emphasis on audience participation and training in a specific set of skills. PowerPoint presentations with audio descriptions are posted online in the Virtual Conference.

COMMITTEE MEETINGS SCHEDULE

The “Schedule” section in the ASHRAE 365 app lets you create your own schedule as well as filter committee meetings by date, time, room, and committee type (Standing, Technical, Project).

In the listing below, floor levels and venue names are indicated in parenthesis, and subcommittees are indented. Rooms will be set as best as possible as indicated in the parentheses beside the committee, i.e., (20/20) will accommodate at least 20 in-person attendees at the conference table and at least 20 chairs for the audience.

NEW! Meetings marked with an “(H)” will have hybrid capabilities for remote committee members to join to achieve quorum. If a committee requested a WebEx meeting from ASHRAE, the requester or chair should have received detailed information including:

- Host log-in information (email address and password)
- Hosting instructions
- Dedicated, secure WiFi network for hybrid meeting hosts.

If the requester or chair did not receive this information in advance, please email meetings@ashrae.org or visit the registration desk at Augustus I/II.

You must register to attend committee meetings. Committee meeting only registration is free.

Register at ashrae.org/2022winter.

Meeting Space Floor and Venue Key

All committee meetings will take place at Caesars Palace. Any events located at the Las Vegas Convention Center will be marked with “LVCC-North” after the Floor number.

WHAT IS A TECHNICAL COMMITTEE?

The technical expertise of ASHRAE is concentrated in its Technical Committees (TCs), Task Groups (TGs), Technical Resource Groups (TRGs) and Multidisciplinary Task Groups (MTGs). These groups are responsible in various degrees for:

- Preparing the text of ASHRAE Handbook chapters
- Originating, coordinating and supervising Society-sponsored research projects
- Presenting programs at ASHRAE conferences
- Reviewing papers for conferences
- Developing ASHRAE publications
- Evaluating the need for standards, and
- Advising the Society on all aspects of the technology it embraces

ASHRAE TCs and these other groups are comprised of volunteers who have a recognized proficiency in a specific field of interest. There are some active 100 TCs addressing all aspects of the HVAC&R and buildings industries.

APPLYING FOR MEMBERSHIP ON A TECHNICAL COMMITTEE

ASHRAE welcomes new members to its technical committees. You can join a technical committee by accessing our website at ashrae.org/joinatc. You will immediately be assigned as a Provisional Corresponding Member for a two-year term. And able to participate in committee activities. At the end of the term, you may be considered for a position that has voting membership.

Please note:

If you do not have an ashrae.org login please go to ashrae.org and click on the Log In tab at the top of the page. Next, click on “Create an Account”.

ATTENDING TECHNICAL COMMITTEE MEETINGS

TC meetings take place at the Society’s Winter and Annual Conferences, and they are open Attend any meetings in which you have a technical interest. TC chairs welcome new attendees—a TC can never have too many willing and able volunteers.

See the listing of Technical Committee meetings in the Final Program, online or in the app.

Project Committees

Attendance at these meetings is open to all Society members, to all registered guests at scheduled Society Conferences, and to those invited by the chairman at the request of a member. You are encouraged to attend any of these meetings in which you have a technical interest

WHAT IS A PROJECT COMMITTEE?

ASHRAE Project Committees (PCs) develop ASHRAE standards and guidelines. ASHRAE PCs consist of people who have a recognized expertise in a specific field of interest. Standards produced by ASHRAE are used as authoritative documents throughout our industry.

APPLYING FOR MEMBERSHIP OF A PROJECT COMMITTEE

ASHRAE welcomes new members to its project committees. With the exception of PC Chairs and Vice Chairs, it is not necessary to be a member of ASHRAE to participate on any of ASHRAE's Standards Project Committee (SPC), Guideline Project Committee (GPC), or Standing Standard/Guideline Project Committees (SSPC, SGPC).

To be considered for project committee membership, you must:

- Create an ASHRAE account if you do not already have an ASHRAE Account.
- Create or update your existing bio as necessary based on your current line of work.
- Complete the online application through the membership portal.
- After you correctly submit all necessary paperwork:
- You will receive an automated email letting you know that your application was successfully submitted.
- ASHRAE staff processes the application and provides the membership package to the PC chair
- The PC Chair reviews the membership package and accepts or declines each applicant
- ASHRAE's Standards Project Liaison Subcommittee approves new members

More details on applying for PC membership are available at <https://www.ashrae.org/technical-resources/standards-and-guidelines/apply-to-a-project-committee>.

ATTENDING PROJECT COMMITTEE MEETINGS

A PC member is expected to attend meetings and pay attention to correspondence. The PC Chair may recommend removal of a PC member for lack of participation such as failing to attend at least half of the scheduled PC meetings in a year.

ASHRAE Project Committees meet at each Society Winter and Annual Conference. Attendance at these meetings is open to everyone. You are encouraged to attend any of these meetings in which you have a technical interest. PC Chairs

welcome visitors to PC meetings – a PC can never have too many willing and able volunteers.

See the listing of Standards and Guidelines Committees meetings in the Final Program, online or in the app.
