

## Kevin Cooper, PE

Kevin is a kW MCE Associate and a Professional Mechanical Engineer with a variety of mission critical project expertise from colocation data centers to oil, gas and chemicals, to security and environmental. With a thorough understanding of how data centers need to operate, Kevin's mechanical designs include chilled water systems, evaporative cooling systems, as well as piping for optimal efficiency. Kevin's ability to apply depth of knowledge to every project, while working with cross-disciplinary internal teams and managing multiple partners, ensures project success.
