

## Brian Medina, PE

Brian is a professional mechanical engineer and Director of Strategy and Development for STACK Infrastructure. Brian began his career as a consulting engineer designing healthcare and mission critical facilities in Chicago, IL, before shifting focus to construction project management. At STACK, Brian's responsibilities include leading development efforts such as location strategy, site selection, land procurement, master planning, and utility interconnection amongst others. His expertise is in large scale chiller plants and modular MEP infrastructure deployments for multi-megawatt buildings and campuses. Brian is active in many industry organizations and previously served as President for the Illinois Chapter of ASHRAE.
