

***Science and Technology for the Built Environment* Online Free for ASHRAE Members**

ASHRAE members have free online access to *Science and Technology for the Built Environment* (STBE) using their ASHRAE member login credentials. Here is the Table of Contents for the latest edition:

Table of Contents

Volume 27, Issue 4, April 2021

Editorial

Professor Raymond Cohen 1923–2020

Articles

- Transport properties of real moist air, dry air, steam, and water
- Effect of laminar airflow unit diffuser size on pathogen particle distribution in an operating room
- Effect of air supply mode on the airflow distribution inside soft sleeper compartments of air-conditioned trains
- Experimental study of the impact of passenger behavior on the aircraft cabin environment
- An integrated approach to evaluate thermal comfort in air-conditioned large-space office
- Experimental study on indoor thermal environment of industrial building spaces enclosed by fabric membranes
- Summer thermal discomfort in substandard housing with openable windows in Hong Kong
- Outdoor space quality: Impact of deep canyon thermal comfort in an urban residential community
- Comparative study of outdoor airflow requirement and distribution in multi-zone VAV system with different control strategies
- Simulation of humidity and temperature distribution in green roof with pozzolana as drainage layer: Influence of outdoor seasonal weather conditions and internal ceiling temperature
- Enhanced CFD-based approach to calculate the evaporation rate in swimming pools

STBE offers comprehensive reporting of original research in science and technology related to the stationary and mobile built environment. Only works reporting on research that is original and of lasting value are accepted for publication. The journal is included in the Web of Science® and Current Contents Connect® databases. All submitted manuscripts are subject to initial appraisal by the editor, and, if found suitable for further consideration, to peer review by independent, anonymous expert referees. All peer review is double blind, and submission is online via [ScholarOne Manuscripts](#). Visit www.ashrae.org/stbe for more information about publishing your paper in STBE.

STBE is published on behalf of ASHRAE by Taylor & Francis Group online and as a printed volume published twice a year. Each issue of STBE contains 150+ pages, with 10 issues published online and combined twice a year in print (June and December). Also, using Taylor & Francis' early online-publication system, Accepted Manuscript Online (AMO), accepted articles are published online in unedited form within 14 days of acceptance.
