### PUBLIC REVIEW—CALL FOR COMMENTS

**30-day Public Review from April 26, 2024 to May 26, 2024**

  
  This proposed addendum updates both the normative and informative references in Standard 15.

- **1st Public Review of BSR/ASHRAE Addendum a to ANSI/ASHRAE Standard 90.4-2022, Energy Standard for Data Centers**
  
  Addendum a aims to provide alignment between Standard 90.4 and ASHRAE’s plans to strengthen the decarbonization components of ASHRAE standards. Standard 90.4 currently regulates data center energy consumption, but cannot regulate data center greenhouse gas emissions, environmental impact, water consumption, and other resources or considerations beyond energy under its current purpose. Addendum a expands the purpose to include resources and considerations beyond energy that contribute to data center sustainability and decarbonization.
