## PUBLIC REVIEW—CALL FOR COMMENTS

## PUBLIC REVIEW—CALL FOR COMMENTS

Constructive comments are invited for the following Public Review Drafts, which can be accessed on ASHRAE’s website at <https://www.ashrae.org/technical-resources/standards-and-guidelines/public-review-drafts>.

All activity for reviewing and commenting on public review drafts can be accomplished completely online. To obtain a paper copy of any Public Review Draft contact ASHRAE, Inc. Attn: Standards Public Review, 1791 Tullie Circle, NE, Atlanta, GA 30329-2305, or via email at: [standards.section@ashrae.org](mailto:standards.section@ashrae.org). **Note: Paper copies are available for \$35.00/copy if 100 pages or less and \$45.00 if over 100 pages.**

**30-day Public Review from February 7, 2020 – March 8, 2020**

- ♦ **1st Public Review of BSR/ASHRAE/IES Addendum b to ANSI/ASHRAE/IES Standard 90.1-2019, *Energy Standard for Buildings Except Low-Rise Residential Buildings***

Demand Controlled Ventilation (DCV) should be required when cost-effective for occupied spaces considering the required outside air for ventilation required based on number of people in the space, varying space sizes, use of energy recovery equipment, and climate zone. The current requirement has a threshold based only on space size and space occupancy. This proposal seeks to more effectively align DCV requirements with all those variables to produce a cost-effective solution.

- ♦ **1st Public Review of BSR/ASHRAE/IES Addendum c to ANSI/ASHRAE/IES Standard 90.1-2019, *Energy Standard for Buildings Except Low-Rise Residential Buildings***

Section 6.4.3.3 includes an exception for off-hour controls in small units. However, this negates the requirements in 6.4.3.3.1 for residential spaces that typically have small HVAC units. The controls for hotel and motel guest rooms have been shown to be cost effective and less costly and less complex controls for apartments will also be cost effective and are readily available. These programmable thermostats are required under residential energy codes for residential spaces in buildings three stories and lower. An exception is made here to allow them in other spaces.

- ♦ **2nd Public Review ISC of BSR/ASHRAE/IES Addendum cr to ANSI/ASHRAE/IES Standard 90.1-2019, *Energy Standard for Buildings Except Low-Rise Residential Buildings***

This second public review draft of Addendum cr modifies the original addendum to clarify that these envelope requirements only apply to new buildings.

- ♦ **2nd Public Review ISC of BSR/ASHRAE/IES Addendum da to ANSI/ASHRAE/IES Standard 90.1-2019, *Energy Standard for Buildings Except Low-Rise Residential Buildings***

The changes to section G2.2 in this addendum are made in response to the public comments that were received during the first public review.

**45 day Public Review February 7, 2020 – March 23, 2020**

- ♦ **1st Public Review of BSR/ASHRAE/IES Addendum a to ANSI/ASHRAE/IES Standard 90.1-2019, *Energy Standard for Buildings Except Low-Rise Residential Buildings***

This proposal establishes minimum fan efficacy requirements for low-power ventilation fans. Additionally, the proposal establishes Standard 62.2 as the reference for determining the minimum ventilation rates for non-transient dwelling units, in accordance with the scope of 62.2 and 62.1.
