- ◆ **SSPC 30, *Method of Testing Liquid Chillers***

PURPOSE:

- 1.1 The purpose of this standard is to prescribe methods of testing to measure the thermal capacity, energy efficiency, and water pressure drop of packaged liquid chiller equipment using a refrigerant vapor compression cycle.
- 1.2 This standard does not specify methods of establishing published ratings or performance tolerances.

SCOPE:

2.1 This standard applies to liquid chilling or liquid heating packaged equipment using any type of compressor, and using the following methods of heat rejection during the cooling cycle:

CALL FOR MEMBERS

- (a) air cooled
 - (b) evaporatively cooled
 - (c) water cooled
- 2.2 This standard includes packaged equipment provided in more than one assembly if the separated or remote assemblies are designed to be used together and are connected together during the test.
- 2.3 This standard does not include the following types of equipment:
- (a) self-contained, mechanically refrigerated drinking-water coolers within the scope of ASHRAE Standard 18
 - (b) unitary water-to-air heat pump equipment within the scope of ASHRAE Standard 37
 - (c) absorption water chilling packages included within the scope of ASHRAE Standard 182
- 2.4 This standard does not include testing of chillers in field installations.
- 2.5 This standard does not specify the test operating conditions.
- 2.6 This standard does not specify methods of performance ratings certification.
