**30-day Public Review from
January 17, 2025 to February 16, 2025**

- ♦ **1st Public Review of BSR/ASHRAE/ICC/USGBC/IES Addendum *k* to ANSI/ASHRAE/ICC/USGBC/IES Standard 189.1-2023, *Standard for the Design of High-Performance Green Buildings Except Low-Rise Residential Buildings***

This addendum modifies portions of section 10 dealing with outdoor air monitoring in the maintenance plan. It simplifies the requirements and eliminates duplication by relying on requirements in Standard 62.1.

PUBLIC REVIEW—CALL FOR COMMENTS

- ♦ **2nd Public Review ISC of BSR/ASHRAE/ICC/USGBC/IES Addendum *e* to ANSI/ASHRAE/ICC/USGBC/IES Standard 189.1-2023, *Standard for the Design of High-Performance Green Buildings Except Low-Rise Residential Buildings***

Addendum e ISC makes modifications based on comments from the first public review. The first change is to use the more general term 'roof' and not the italicized term that restricts the provisions to locations that are defined in the 90.1 definition. Therefore, the term is changed in 5.3.5.3 (a) and (b) for it to be consistently applied. In addition, summer solstice is clear in this context. The second change is modification of exception for stone ballasted roofs that reinstates a minimum weight of 17 lb/ft² (83 kg/m²) in climate zones 4A and 4B.

**45-day Public Review from
January 17, 2025 to March 3, 2025**

- ♦ **1st Public Review Draft of Addendum *a* to ASHRAE Guideline 41-2023, *Design, Installation and Commissioning of Variable Refrigerant Flow (VRF) Systems***

This addendum includes editorial changes and updates to Sections 3 through 7 to comply with current ANSI/ASHRAE Standard 15.
