PUBLIC REVIEW—CALL FOR COMMENTS

Constructive comments are invited for the following Public Review Drafts, which can be accessed on ASHRAE's website at <https://www.ashrae.org/technical-resources/standards-and-guidelines/public-review-drafts>. All activity for reviewing and commenting on public review drafts can be accomplished completely online. To obtain a paper copy of any Public Review Draft contact ASHRAE, Inc. Attn: Standards Public Review, 180 Technology Parkway, Peachtree Corners, GA 30092, or via email at: standards.section@ashrae.org. **Note: Paper copies are available for \$35.00/copy if 100 pages or less and \$45.00 if over 100 pages.**

**30-day Public Review from
July 28, 2023, to August 27, 2023**

♦ **1st Public Review of BSR/ASHRAE/IES Addendum *m* to ANSI/ASHRAE/IES Standard 90.1-2022, *Energy Standard for Sites and Buildings Except Low-Rise Residential Buildings***

This addendum adds rating requirements for DX fin-and-tube coils (AHRI 410-2023) and exhaust energy recovery heat exchangers (AHRI 1060) with the exception of systems that are rated under CSA C439-2018 or where other international standards are accepted.

♦ **2nd Public Review ISC of BSR/ASHRAE/IES Addendum *h* to ANSI/ASHRAE/IES Standard 90.2-2018, *High-Performance Energy Design of Residential Buildings***

Addendum h proposed changes to the maximum allowable air leakage in the building thermal envelope. This ISC further adjusts the required value from 3.6 ACH50 to 3.0 ACH50, as fitting for a leadership standard. Additional improvements to language are also provided in this updated draft.

♦ **1st Public Review of BSR/ASHRAE/IES Addendum *i* to ANSI/ASHRAE/IES Standard 90.2-2018, *High-Performance Energy Design of Residential Buildings***

The purpose of addendum i is to establish terminology for common spaces, in accordance with the recent scope change that enables 90.2 to address high-rise residential buildings.

♦ **1st Public Review of BSR/ASHRAE/IES Addendum *k* to ANSI/ASHRAE/IES Standard 90.2-2018, *High-Performance Energy Design of Residential Buildings***

Addendum k contains modifications to Section 10, Normative References, necessitated by the revision of multiple reference standards since the latest publication of 90.2.

**45-day Public Review from
July 28, 2023, to September 11, 2023**

- ♦ **1st Public Review of BSR/ASHRAE/ICC/USGBC/IES Addendum bh to ANSI/ASHRAE/ICC/USGBC/IES Standard 189.1-2020, *Standard for the Design of High-Performance Green Buildings Except Low-Rise Residential Buildings***

This proposal addresses two issues as a result from comments concerning published Addendum ag to ASHRAE Standard 189.1-2020. Even more savings are possible if residential lighting were segmented by lamp type and luminaire type and set specific luminous efficacies for those segments of the lamp and luminaire market. The current additional lighting power allowances for decorative lighting are too broadly applied. Many types of spaces do not need additional decorative lighting above that already permitted by the base power allowance.
