Constructive comments are invited for the following Public Review Drafts, which can be accessed on ASHRAE’s website at https://www.ashrae.org/technical-resources/standards-and-guidelines/public-review-drafts. All activity for reviewing and commenting on public review drafts can be accomplished completely online. To obtain a paper copy of any Public Review Draft contact ASHRAE, Inc. Attn: Standards Public Review, 180 Technology Parkway, Peachtree Corners, GA 30092, or via email at: standards.section@ashrae.org. Note: Paper copies are available for $35.00/copy if 100 pages or less and $45.00 if over 100 pages.

### 30-day Public Review from March 10, 2023 to April 9, 2023

  Proposed Addendum i to Standard 55-2020 updates normative references to updated versions of ASHRAE publications.

  Proposes an adjustment to values for achieving Energy Credit H05 (Ground-Source Heat Pump System) in Climate Zones 0A, 0B, and 1A to reflect that a smaller ground source field can be accommodated using a larger heat rejection device.

  Modifies portions of Section 12 (Energy Cost Budget) and Appendix G (Performance Rating Method) to align HVAC and lighting schedules with settings that are eligible for Energy Credits through Section 11.

### In response to the first round of public review comments, this independent substantive change lowers the additional lighting power allowance for interior exit stairways and updates the associated control requirements.

#### 45-day Public Review from March 10, 2023 to April 24, 2023

  This addendum clarifies lighting terminology which previously led to confusion over the difference between lighting power allowance (LPA) and lighting power density (LPD). It also provides explicit instructions for using the LPD to determine the lighting allowance for a particular area. Finally, this addendum rearranges some of the existing lighting requirements in an effort to achieve greater clarity around Section 9 compliance.

  This revision of ANSI/ASHRAE Standard 86-2013 provides a method for measuring the waxing tendency of refrigeration-grade oils.
