- ♦ **ANSI/ASHRAE Standard 41.8-2016R, Standard Methods for Liquid Flow Measurement**

**Purpose:** This standard prescribes methods for liquid flow measurement.

**Scope:** This standard applies to laboratory and field liquid flow measurement for testing heating, ventilating, air-conditioning, and refrigerating systems and components. This standard is restricted to applications where the entire flow stream of liquid enters and exits the liquid flowmeter in a “liquid-only” state during data recording with the following exception:

- a. This standard does not apply to liquid-phase refrigerant mass flow measurements where the liquid flow includes circulating lubricant. Those measurements are within the scope of ASHRAE Standard 41.10.
