### 45-day Public Review from
**May 17, 2024 to July 1, 2024**

This revision of ANSI/ASHRAE Standard 172-2017 defines a test method to determine the formation of insoluble materials in lubricant and refrigerant systems. The test will determine the presence of materials that separate from refrigerant and lubricant mixtures over a range of temperatures and concentrations. The test is based on the precipitation of insoluble material in a lubricant/refrigerant combination. The results can be used to compare lubricants and refrigerants.
