30-day Public Review from November 4, 2022 to December 4, 2022

This proposed addendum adds U.S. regional energy conversion factors to the normative section of the standard that provides AHJs with the option to use regional U.S. energy conversion factor values for electricity.

This independent substantive change draft of proposed Addendum g to Standard 100-2018 provides some clarification on how to interpret Figure 5-1, “Net Energy Concept” in calculating net energy use.

- SPC 29, Methods of Testing Automatic Ice Makers

1. PURPOSE: The purposes of this standard are:
   - This standard prescribes a method of testing automatic ice makers by:
     a) specifying procedures to be used when testing automatic ice makers,
     b) establishing the types of equipment to which the provisions of the standard apply,
     c) defining terms describing the equipment covered and terms related to testing,
     d) specifying the type of instrumentation and test apparatus required in testing,
     e) specifying a uniform method for calculation of results, and
     f) specifying data and results to be recorded.

2. SCOPE:
   - a) This standard does not include automatic ice makers installed in household refrigerators, combination refrigerator-freezers, and household freezers.

   Note: SPC 29 is especially interested in obtaining members from the Producer (manufacturer) interest category.
