- ♦ **1st Public Review of BSR/ASHRAE Addendum g to ANSI/ASHRAE Standard 55-2017, *Thermal Environmental Conditions for Human Occupancy***
Addendum g to Standard 55-2017 proposes to make Figure 5.3.2C consistent with the language of Section 5.3.3.1 where both a met condition and clo condition are provided. The original version of the graphic only incorrectly only referenced the met condition.
- ♦ **1st Public Review of BSR/ASHRAE Addendum h to ANSI/ASHRAE Standard 55-2017, *Thermal Environmental Conditions for Human Occupancy***
Addendum h to Standard 55-2017 updates normative references to updated versions of ASHRAE publications and also replaces the normative reference to the ASHRAE Thermal Comfort Tool. The current reference to the ASHRAE Thermal Comfort Tool v2 has not been valid for Standard 55 since the 2010 version of the Standard. In addition to the Thermal Comfort Tool reference changes, normative references to Standards 90.1, 62.1, and 62.2 have been updated to the latest versions. Finally, the references to the ASHRAE Handbook of Fundamentals have been updated to the relevant sections of the most current version of the Handbook and consolidated to a single reference.

A complete listing of project committee interim meetings is provided on ASHRAE’s website at: <https://www.ashrae.org/technical-resources/standards-and-guidelines/project-committee-interim-meetings>.
