30-day Public Review from
October 13, 2023, to November 12, 2023

  Addendum n modifies Appendix G performance requirements to enable a proposed design to utilize the IAQ Procedure from 62.1-2022

  This proposed Independent Substantive Change to Addendum c (Deadband) is intended to clarify issues that were raised during the first public review. The revisions are aimed at better communicating the requirements for special occupancies and set back operation.

  Addendum n proposes new requirements for electric vehicle supply equipment.

- **2nd Public Review ISC of BSR/ASHRAE/IES Addendum g to ANSI/ASHRAE/IES Standard 90.2-2018, High-Performance Energy Design of Residential Buildings**

  This proposed Independent Substantive Change to Addendum g (IAQ updates) includes multiple revisions based on the first public review comments. It eliminates the two-inch minimum filter depth requirement, specifies how to test the garage-to-house enclosure boundary for air leakage, and corrects the kitchen exhaust hood capture requirements based on the latest ASTM E3087.
