**30-day Public Review from
October 25, 2024 to November 24, 2024**

- ♦ **First Public Review Draft of BSR/ASHRAE Addendum i to Standard 30-2019, *Method of Testing Liquid Chillers***

Addendum i to Standard 30-2019 makes TPS changes to the standard.

- ♦ **First Public Review Draft of BSR/ASHRAE Addendum g to ANSI/ASHRAE Standard 62.2-2022, *Ventilation and Acceptable Indoor Air Quality in Residential Buildings***

ASHRAE has a policy expressed in the [Position Document on Environmental Tobacco Smoke](#) which recommends that "Standards and Guidelines shall not prescribe ventilation rates or claim to provide acceptable indoor air quality in smoking spaces" because of adverse health effects. This proposed addendum modifies the Scope in 62.2 to reflect ASHRAE policy. This change makes it clear that this standard does not claim to achieve acceptable indoor air quality in buildings in which smoking is permitted.

PUBLIC REVIEW—CALL FOR COMMENTS

- ♦ **First Public Review Draft of BSR/ASHRAE Addendum r to ANSI/ASHRAE Standard 62.2-2022, *Ventilation and Acceptable Indoor Air Quality in Residential Buildings***

This proposed addendum would broaden the scope of Standard 62.2 to cover spaces adjacent to dwelling units that are not covered by other ASHRAE standards (i.e., ASHRAE Standard 62.1 or ASHRAE/ASHE Standard 170). Adjacent spaces that are outside the dwelling unit, such as crawl spaces or attics, may impact the indoor air quality within the dwelling unit. By adding these spaces to the scope of Standard 62.2, addenda could be proposed that would add requirements for these adjacent spaces to improve the indoor air quality in the dwelling unit.
