PUBLIC REVIEW—CALL FOR COMMENTS

Constructive comments are invited for the following Public Review Drafts, which can be accessed on ASHRAE's website at <u>https://www.ashrae.org/technical-resources/standards-and-guidelines/public-review-drafts</u>.

All activity for reviewing and commenting on public review drafts can be accomplished completely online. To obtain a paper copy of any Public Review Draft contact ASHRAE, Inc. Attn: Standards Public Review, 1791 Tullie Circle, NE, Atlanta, GA 30329-2398, or via email at: <u>standards.section@ashrae.org</u>. Note: Paper copies are available for \$35.00/copy if 100 pages or less and \$45.00 if over 100 pages.

<u>30-day Public Review from</u> September 4, 2020 to October 4, 2020

• 2nd Public Review of BSR/ASHRAE Addendum c to ANSI/ASHRAE Standard 62.1-2019, Ventilation for Acceptable Indoor Air Quality

The definition for unusual source is unclear in distinguishing whether rarely refers to a source that is intermittent or transient within a space or if it is meant in the sense of commonality as in an object that would not be commonly found within in a space regardless of the duration of its presence. This proposed addendum seeks to bring clarity to what the committee considers as an unusual source. The new definition makes clear that the unusual nature of a source has to do with its relationship to common items and activities within the space.

 1st Public Review of BSR/ASHRAE Addendum d to ANSI/ASHRAE Standard 62.1-2019, Ventilation for Acceptable Indoor Air Quality

This proposed addendum clarifies that open circuit cooling towers, closed circuit cooling towers, and evaporative condensers are all covered by the minimum separation distance requirements.
