### 30-day Public Review from September 5, 2025 to October 5, 2025

 Second Public Review (Independent Substantive Change) of BSR/ASHRAE Addendum h to ANSI/ASHRAE Standard 15-2024, Safety Standard for Refrigeration Systems

The change retains the original intent of the 2024 edition, to prohibit other reuses of recovered or recycled refrigerants that are not explicitly permitted.

45-day Public Review from September 5, 2025 to October 20, 2025

 Advisory Public Review of ASHRAE Standard 242P, Standard Methods for Quantifying Greenhouse Gas Emissions Factors for Building Operations

This is the first advisory public review period for ASHRAE Standard 242P. The draft standard provides methods for quantifying fuel, electricity, and district thermal energy emissions factors. 242P was developed to be compatible with existing ASHRAE standards that include provisions for emissions performance. We welcome commenter input and ideas for improving the current draft.
