30-day Public Review from September 9, 2022 – October 9, 2022

 1st Publication Public Review of BSR/ASHRAE Addendum t to ANSI/ASHRAE Standard 15-2019, Safety Standard for Refrigeration Systems

This proposed addendum addresses changes for application of cooling equipment specific to information technology equipment (ITE) and data center installations. The same mitigation principles (refrigerant charge size restrictions, refrigerant detection, air circulation and product listing) are the same as other applications using flammable refrigerants. One significant difference in ITE applications, due to the sensitive nature of electronic equipment to cleanliness, is that emergency ventilation of outside air is not an acceptable mitigation strategy.

45-day Public Review from September 9, 2022 – October 24, 2022

 1st Publication Public Review of BSR/ASHRAE Standard 224P, Standard for the Application of Building Information Modeling

ASHRAE Standard 224-202x provides minimum requirements for the application of Building Information Modeling (BIM) to the planning, design, construction, and operation of buildings. This standard defines how to incorporate BIM requirements in design, construction, and operations services contracts.
