Designation and Safety Classification of Refrigerants

This addendum was approved by a Standing Standard Project Committee (SSPC) for which the Standards Committee has established a documented program for regular publication of addenda or revisions, including procedures for timely, documented, consensus action on requests for change to any part of the standard. Instructions for how to submit a change can be found on the ASHRAE® website (https://www.ashrae.org/continuous-maintenance).

The latest edition of an ASHRAE Standard may be purchased on the ASHRAE website (www.ashrae.org) or from ASHRAE Customer Service, 180 Technology Parkway, Peachtree Corners, GA 30092. E-mail: orders@ashrae.org. Fax: 678-539-2129. Telephone: 404-636-8400 (worldwide), or toll free 1-800-527-4723 (for orders in US and Canada). For reprint permission, go to www.ashrae.org/permissions.

Addendum ad adds single-compound refrigerant R-1132(E) to Tables 4-1, D-1, and E-1.

Note: In this addendum, changes to the current standard are indicated in the text by underlining (for additions) and strikethrough (for deletions) unless the instructions specifically mention some other means of indicating the changes.

Modify Tables 4-1, D-1, and E-1 as shown.

Table 4-1 Refrigerant Data and Safety Classifications
Refrigerant Number = R-1132(E)
Chemical Name = trans-1,2-difluoroethene
Chemical Formula = HFO-1132(E)
OEL = 350 ppm v/v
Safety Group = B2
RCL = 11,000 ppm v/v; 1.8 lb/Mcf; 28 g/m³
LFL = 43,000 ppm v/v; 7.0 lb/Mcf; 113 g/m³
Highly Toxic or Toxic Under Code Classification = Neither

Table D-1 Refrigerant Data
Refrigerant Number = R-1132(E)
Chemical Name = trans-1,2-difluoroethene
Chemical Formula = HFO-1132(E)
Relative Molar Mass = 64.0 g/mol
Normal Boiling Point (°F) = –62.5
Normal Boiling Point (°C) = –52.5

Table E-1 Toxicity Table for Standard 34
Refrigerant Number = R-1132(E)
Chemical Name = trans-1,2-difluoroethene
LC₅₀ = 106,000 ppm
Cardiac Sensitization LOEL = ND
Cardiac Sensitization NOEL = 116,000 ppm
Anesthesia EC₅₀ = ND
Anesthesia LOEL = ND
Anesthesia NOEL = 106,250 ppm
Other = ND
ATEL = 30,000 ppm
ODL = 140,000 ppm
FCL = 11,000 ppm
RCL = 11,000 ppm
LFL = 43,000 ppm
ATEL Source = Mortality
RCL Source = FCL
ASHRAE is concerned with the impact of its members’ activities on both the indoor and outdoor environment. ASHRAE’s members will strive to minimize any possible deleterious effect on the indoor and outdoor environment of the systems and components in their responsibility while maximizing the beneficial effects these systems provide, consistent with accepted Standards and the practical state of the art.

ASHRAE’s short-range goal is to ensure that the systems and components within its scope do not impact the indoor and outdoor environment to a greater extent than specified by the Standards and Guidelines as established by itself and other responsible bodies.

As an ongoing goal, ASHRAE will, through its Standards Committee and extensive Technical Committee structure, continue to generate up-to-date Standards and Guidelines where appropriate and adopt, recommend, and promote those new and revised Standards developed by other responsible organizations.

Through its Handbook, appropriate chapters will contain up-to-date Standards and design considerations as the material is systematically revised.

ASHRAE will take the lead with respect to dissemination of environmental information of its primary interest and will seek out and disseminate information from other responsible organizations that is pertinent, as guides to updating Standards and Guidelines.

The effects of the design and selection of equipment and systems will be considered within the scope of the system’s intended use and expected misuse. The disposal of hazardous materials, if any, will also be considered.

ASHRAE’s primary concern for environmental impact will be at the site where equipment within ASHRAE’s scope operates. However, energy source selection and the possible environmental impact due to the energy source and energy transportation will be considered where possible. Recommendations concerning energy source selection should be made by its members.
About ASHRAE

Founded in 1894, ASHRAE is a global professional society committed to serve humanity by advancing the arts and sciences of heating, ventilation, air conditioning, refrigeration, and their allied fields.

As an industry leader in research, standards writing, publishing, certification, and continuing education, ASHRAE and its members are dedicated to promoting a healthy and sustainable built environment for all, through strategic partnerships with organizations in the HVAC&R community and across related industries.

To stay current with this and other ASHRAE Standards and Guidelines, visit www.ashrae.org/standards, and connect on LinkedIn, Facebook, Twitter, and YouTube.

Visit the ASHRAE Bookstore

ASHRAE offers its Standards and Guidelines in print, as immediately downloadable PDFs, and via ASHRAE Digital Collections, which provides online access with automatic updates as well as historical versions of publications. Selected Standards and Guidelines are also offered in redline versions that indicate the changes made between the active Standard or Guideline and its previous version. For more information, visit the Standards and Guidelines section of the ASHRAE Bookstore at www.ashrae.org/bookstore.

IMPORTANT NOTICES ABOUT THIS STANDARD

To ensure that you have all of the approved addenda, errata, and interpretations for this Standard, visit www.ashrae.org/standards to download them free of charge.

Addenda, errata, and interpretations for ASHRAE Standards and Guidelines are no longer distributed with copies of the Standards and Guidelines. ASHRAE provides these addenda, errata, and interpretations only in electronic form to promote more sustainable use of resources.
