ERRATA SHEET FOR
ANSI/ASHRAE STANDARD 30-2019
Method of Testing Liquid Chillers

April 24, 2024

The corrections listed in this errata sheet apply to ANSI/ASHRAE Standard 30-2019. The first printing of 30-2019 is identified as “Product Code: 86087 5/19” on the outside back cover. Shaded items have been added since the previously published errata sheet dated May 18, 2023 was distributed.

Page 7  5.4.2.2. In the $W_{\text{input}}$ equation, change the subscript $i$ to $j$ as shown below.

$$W_{\text{input}} = \sum_i W_i + \sum_j Q_j$$

Page 8  5.4.4.2. In both the equation and the table header, correct the variable symbol for pipe roughness to be the lower-case Greek letter epsilon. Change $\varepsilon$ to $\epsilon$ as shown below.

$$f = \frac{0.25}{\log_{10} \left( \frac{\varepsilon - \epsilon}{d} + \frac{5.74}{\text{Re}^{0.9}} \right)}$$

<table>
<thead>

Page 12  5.7.7.3. Revise Section 5.7.7.3 as shown below.
5.7.7.3 When two or more figures fall to the right of the last figure to be retained, they are to be considered as a group in rounding decisions. Thus in 2.4(501), the group “(501)” is considered to be **greater than five** less than five, while for 2.5(499), “(499)” is considered to be **less than five** greater than five.

15 6.3.1.4.1.1. In the first sentence of Section 6.3.1.4.1.1 change the word “optical” to “optional” as shown below.

6.3.1.4.1.1 Units with an **optional** optical integrated evaporator or condenser liquid pump shall be tested in either of the following two configurations.

22 **Table 6-6 Definition of Operating Condition Tolerances and Stability Criteria (Continued).** For evaporator or condenser, entering air mean dry-bulb temperature, heating (frosting), change the stability criteria term from “5.6” to “0.56” as shown below.

Heating portion: \( s_{f} \leq 0.56 \Delta^\circ C \) [1.00 \( \Delta^\circ F \)]

31 **11. Normative References.** Change the date on Reference 2 in Section 11 from 1999 to 2001 as shown below.
